Art Unit: 3751

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 16, drawn to a pool water level control device, classified in class 4, subclass 507.
- II. Claim 15, drawn to an automatic fill and screen backflush device, classified in class 210, subclass 169.

The inventions are distinct, each from the other because:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 15 does not rely upon the structure recited in claims 1, 4, 8, 9 and 16 for patentability. The subcombination has separate utility such as a pool without a backflush feature.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to divergent

fields of search, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Becky L. Troutman on January 23, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

3. Any inquiry concerning this communication should be directed to Robert M. Fetsuga at telephone number 703/308-1506 who can be most easily reached Monday through Thursday.
